## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-27, drawn to methods for creating one or more channels and deployment instructions, maintaining the channels and the deployment instructions, and performing the tasks assigned to the targets, classified in class 717, subclass 172.
  - II. Claims 28-46, drawn to methods for receiving a request, determining the association between targets and groups, adding the target to groups, classified in class 717, subclass 177.
  - III. Claims 47-60, drawn to methods for installing the installation files, classified in class 717, subclass 177.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, and III are related as combination and subcombination.

Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because creating the channels and performing the tasks of Group I do not discuss the determination by the

server if the target is associated with one or more groups and adding the target to the group of Group II and the automatic installation of the installation files for the channel client component and service and receiving the files through a subscription file of Group III. The subcombination has separate utility such as a method of automatically installing the installation files for the component and service; a method of adding the target to the group. Also, the automatically adding the target to the groups by the determination steps of Group II does not discuss the installation without a user logged on and the user's permissions of Group III. The subcombination has separate utility such as a method of automatically installing the installation files for the component and service and receiving the files through a subscription file.

3. A telephone call was made to Ms. McCrackin on 6/21/2005 to request an oral election to the above restriction requirement, but did not result in an election being made. Ms. McCrackin requested the examiner to send the written restriction requirement.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Insun Kang whose telephone number is 571-272-3724. The examiner can normally be reached on M-F 7:30-4 PM.
